- Kharadar, Karachi, Pakistan

EDUCATION

Graduation
IQRA University
In Progress

Intermediate
Nusrat Bhutto Government College
2022 - 2024

Matriculation
Amma Foundation School
2021 - 2022

SKILLS

- React.js
- Next.js
- Responsive Web Design
- Advanced JavaScript (ES6+)
- HTML5 & CSS3
- Firebase (Auth, Push Notifications)
- RESTful API Integration
- Socket.io (Client-side)
- UI/UX Principles
- Git & Version Control

ABOUT ME

I'm a skilled front-end developer with a strong focus on building responsive, high-performance web applications using React.js. With deep experience in crafting dynamic user interfaces and intuitive user experiences, I turn complex problems into clean, scalable solutions. Proficient in modern JavaScript, CSS, and front-end architecture, I write efficient, maintainable code and stay ahead of the curve with the latest web technologies. I'm passionate about creating seamless digital experiences that drive impact.

EXPERIENCE

Sid Techno
Mern Stack Developer
MAR-2024 - PRESENT

As a front-end developer with a strong foundation in the MERN stack, I specialize in crafting dynamic, responsive, and high-performance web interfaces using React.js. My work emphasizes seamless user experiences, efficient UI architecture, and modern development practices.
Key achievements and responsibilities:

- Developed and optimized scalable, fast-loading front-end applications using React.js.
- Built interactive, real-time UIs using Firebase Realtime Database and WebSocket-based live chat features.
- Integrated Firebase Push Notifications to enhance user engagement on mobile and web platforms.
- Designed and implemented responsive layouts to ensure a seamless experience across all devices.
- Integrated third-party services like Google Sign-In (Next.js) and Google Maps for rich, interactive features.
- Handled front-end integration with AWS S3 for efficient image upload and rendering workflows.
- Collaborated closely with designers, back-end engineers, and stakeholders to deliver intuitive, user-centric solutions.
- Followed best practices for clean, maintainable code and kept up with the latest front-end trends and technologies.

Sid Techno
Mern Stack Internship
DEC-2023 - FEB-2024

I completed a 3-month front-end development internship where I actively contributed to the design and development of responsive, user-centric web applications using HTML, CSS, JavaScript, and React.js. Working within a collaborative team environment, I was involved in building and refining reusable UI components, integrating RESTful APIs, and ensuring cross-device compatibility and performance optimization. I gained practical experience in using modern development tools and frameworks, and also explored Angular to expand my front-end toolkit. Throughout the internship, I focused on improving user experience through clean design, intuitive interfaces, and efficient code practices. This hands-on experience enhanced not only my technical front-end capabilities but also sharpened my problem-solving, debugging, and team collaboration skills in a real-world agile workflow.
